

Bài 3: Tạo class Person và class Employee và class Manager

Vol 3:

class Person {

private String name;

private Date birthday;

Person(String name, Date birthday) {

this.name = name;

this.birthday = birthday;

}

public void setName(String name) { this.name = name; }

public void setBirthday(Date birthday) { this.birthday = birthday; }

public String getDetails() { return this.name + " " + this.birthday; }

}

class Employee extends Person {

private double salary;

Employee(String name, Date birthday, double salary) {

super(name, birthday);

this.salary = salary;

}

public void setSalary(double salary) { this.salary = salary; }

```
@Override
public String getDetails() { return super.getDetails() + " " + this.Salary; }
}
```

```
class Manager extends Employee {
    private Employee assistant;
    Manager (String name, Date birthday, double salary, Employee assistant) {
        super(name, birthday, salary);
        this.assistant = assistant;
    }
}
```

```
public void setAssistant (Employee assistant) {
    this.assistant = assistant;
}
}
```

```
@Override
public String getDetails() { return super.getDetails() + " " + this.assistant.getDetails(); }
}
```

```
public class Test {
    public static void main (String[] args) {
        Employee a = new Employee ("Tu", "13/2/2000", 2000);
        Manager b = new Manager ("Vun", "21/9/2006", 9000, a);
        System.out.println (a.getDetails());
        System.out.println (b.getDetails());
    }
}
```
